Education

Symbiosis Institute

Post Graduate Diploma Information Technology

January 2013

Pune, Maharashtra, India

Pune University

Bachelor of Engineering Electronics and Telecommunications

January 2007

Pune, Maharashtra, India

Experience

Cloud Operations Architect (DevOps)

DevOps

Full-time

2017 – Present

- Functioned as a DevOps Engineer, managing Tibco Spotfire enterprise & Cloud product support across AWS Cloud and Azure Cloud.
- Successfully recruited and built an entire team of 15 members, leading them across 4 different projects/products simultaneously.
- Coordinated production deployments and hot-fixes, ensuring seamless operations for critical applications.
- Developed shell scripts for automation, including extracting and shutting down AWS running instances, releasing free EIPs, and triggering scripts via Lambda functions.
- Arranged and conducted workshops on new AWS services to foster team knowledge and capability development.

Administration, Automation & Monitoring

Synechron Technologies Limited

Full-time

2014 – 2017

- Managed Linux media server farms and provided application support across Linux/Unix and Linux-Xen Servers.
- Performed patching of Linux physical and Xen boxes, ensuring system stability and security.
- Created Satellite channels on Redhat Satellite server and implemented automation using shell scripting and MySQL DB support.
- Responsible for troubleshooting customized applications and maintaining robust system operations.

Development, Automation & Monitoring

Tsys Limited

Full-time

2010 – 2014

- Provided access to users on RHDS, CVS, dot project servers, and dev/prod VDI servers.
- Managed MySQL databases and developed shell scripts to automate various tasks.
- Conducted requirements analysis for projects, planning environment setup and access permissions.
- Implemented MySQL replication over Linux servers and fine-tuned existing applications, including rigorous testing and debugging of scripts.

Senior System Engineer

Patni Computer Systems Limited

Full-time

Jan 2007 – Mar 2009

- Provided L1 support, monitored P8 Filenet applications, and managed user-raised tickets for the CPI project.
- Administered 10 Linux Proxy servers and MySQL servers, including implementing MySQL replication and taking database backups using mysqldump.
- Developed and deployed shell scripts to automate tasks such as deleting logs older than five days on production servers.
- Prepared and tested SQL queries for clients, handled Oracle database operations (insert, select, update), and managed bugs.
- Ensured the proper functioning of customer applications like eProcess and Trexo, and customized Filenet instances.

Projects

CPI (Genworth Financial)

Jan 2007 – Mar 2009

- Executed maintenance and enhancements of applications within Genworth Imaging Solutions.
- Managed the processing of scanned insurance documents, storing information in Oracle Database and images in P8 Filenet.
- Developed and maintained multiple applications for generating reports to be sent to providers.

Skills

Cloud DevOps: AWS (EC2, RDS, CloudFormation, Lambda, DynamoDB, CloudWatch, Auto-scaling, Elastic Beanstalk), Azure, Cloud Computing, DevOps, Automation, Solution Architecture, AppDynamics

Scripting Programming: Shell Scripting, Python, SQL, Bash

Operating Systems Virtualization: Linux/Unix, RedHat (Satellite, RHDS), IBM AIX, Linux-Xen, Windows, VDI

Databases: MySQL, Oracle

Tools Platforms: Puppet, Tibco Spotfire, P8 Filenet, CVS, Dot Project

Web Technologies: HTML
