Education

JNTU

Masters of Science Information Technology

June 2015 – June 2017, Hyderabad, India

Experience

DevOps Engineer

Full-time

Nendrasys Technologies Pvt Ltd

July 2017 – September 2019, Hyderabad, India

- Gained extensive technical knowledge and hands-on experience in DevOps, Automation, Build Engineering, and Configuration Management.
- Created fully automated CI build and deployment infrastructure and processes for multiple projects.
- Developed scripts for build, deployment, maintenance, and related tasks using Jenkins.
- Installed, configured, and maintained Continuous Integration, Automation, and Configuration Management tools.
- Developed Ant, Maven, and Shell scripts to automatically compile, package, and deploy WAR, EAR, and JAR files of multiple applications to various platforms.
- Created repositories, branches, managed user permissions, and maintained GIT and Bitbucket.
- Deployed and maintained code and applications, configuring components to increase re-usability.
- Worked closely with Architecture, Development, Test, Security, and IT Services teams.
- Supported Business Analysts in adopting newly created jobs and release activities.
- Communicated daily with On-Site Teams, analyzed requirements, identified gaps, and tracked logs and issues.

Projects

Sloan Global Holdings (E-commerce)

July 2017 – December 2018

Description: Designed and developed e-commerce product features for a B2B project, focusing on online sales, distribution, and marketing of fixers, sinks, and related products.

- Demonstrated detailed technical knowledge and hands-on experience in DevOps, automation, build engineering, and configuration management.
- Created fully automated CI build and deployment infrastructure and processes.
- Developed scripts for build, deployment, and maintenance tasks using Jenkins.
- Installed, configured, and maintained Continuous Integration, Automation, and Configuration Management tools.
- Developed Ant, Maven, and Shell scripts to automatically compile, package, and deploy WAR, EAR, and JAR files to various platforms.
- Created repositories, branches, managed user permissions, and maintained GIT and Bitbucket.
- Deployed and maintained code and applications, configuring components to increase re-usability.
- Collaborated with Architecture, Development, Test, Security, and IT Services teams.
- Supported Business Analysts in using newly created jobs and release activities, communicated daily with On-Site Team.
- Analyzed requirements, identified gaps, and tracked logs and issues effectively.

Bangkok Bank Limited (BBL) Thaitrade (E-commerce & Payment portal)

January 2019 – September 2019

Description: Designed and developed an e-commerce payment portal system supporting multiple B2B/B2C merchants with various online and offline payment options, integrating with Thai Trade.

- Served as a DevOps Engineer for a team involving different development teams and multiple simultaneous software releases.
- Participated in weekly release meetings to identify and mitigate potential risks associated with releases.
- Responsible for creating repositories, branches, managing user permissions, and maintaining GIT.
- Created fully automated CI build and deployment infrastructure and processes for multiple projects.
- Analyzed and resolved conflicts related to merging of source code for GIT.
- Responsible for creating Ant and Maven scripts for build automation.

- Implemented a Master-slave architecture setup to improve Jenkins performance.
- Handled end-to-end deployments and code propagations across different environments, from DEV to PROD.
- Managed the development and maintenance of Change Tasks.
- Worked closely with Developers, QA, Performance, UAT testers, and IT Team.
- Created and maintained documentation of build and release processes and application configuration.
- Coordinated with developers, Business Analysts, and Managers to ensure smooth code deployment in the Production environment.
- Planned and tracked activities involved in build and deployment, and resolved build issues.
- Developed scripts for build, deployment, maintenance, and related tasks using Jenkins.
- Collaborated with Development, QA, and Product Management teams on build plans and schedules.
- Sent daily and weekly reports to the team.
- Involved in creating repositories, branches, merging activities, backup, and restore activities in Subversion servers.
- Maintained Maven and Shell scripts for safe builds and deploys.

Skills

DevOps CI/CD: DevOps Methodologies – Continuous Integration and Deployment (CI/CD) – Jenkins – Ansible – Ant – Maven – Shell Scripting – Requirement Gathering – Documentation & Reporting – Software Development Life Cycle (SDLC) – Software Testing Life Cycle (STLC) – Test Reports – Deployment – Configuration Management – Change Management

Version Control: GIT – Bitbucket

Programming Languages: C – Core Java

Operating Systems: Linux

Application Servers: Apache Tomcat Server
