

Amr Gamal

Network Security Engineer

amr.gamal@email.com | +20 100 123 4567 | github.com/amr-gamal | [linkedin.com/in/amr-gamal](https://www.linkedin.com/in/amr-gamal)

Education

Mumbai University

B.E. in Technology

January 2018, Mumbai, India

Experience

Network Security Engineer

Full-time - On-Site

Egy-Tech Solutions

August 2018 - Present, Cairo, Egypt

- Troubleshoot firewall-related incidents for customers, ensuring timely resolution and minimal disruption.
- Solved technical problems relating to installing and configuring security solutions for various network environments.
- Analyzed security requirements of network systems, contributing to the design and implementation of robust security postures.
- Reviewed configuration and maintained Cisco ASA Firewalls, routers, and switches to uphold security standards and operational efficiency.
- Reviewed and modified Access Control Lists (ACLs) on network switching and routing equipment as needed to maintain stringent security standards.
- Participated in the core network team to upgrade corporate network infrastructure, enhancing performance and security.
- Maintained network security technologies and services, ensuring continuous protection against emerging threats.
- Interacted with clients to analyze operational requirements and translate them into effective security solutions.
- Installed and configured IPsec and SSL VPNs, facilitating secure remote access and site-to-site connectivity.
- Reviewed and configured VLANs, Routing Protocols (RIP, OSPF, EIGRP), and NAT configurations.
- Provided support for clients in various networking issues, ensuring high availability and optimal network performance.

Projects

Temperature Controlled Cooling Fan

2016 - 2017

- Sensed temperature levels and automatically activated a cooling fan when the temperature exceeded a set limit.
- Developed with the aim to control the temperature of devices and reduce damages caused by overheating.

Automatic Plant Watering System

2017

- Sensed soil moisture levels and automatically activated a water pump when moisture dropped below a threshold.
- Ensured optimal plant hydration and reduced the need for manual watering.

Certificates

Cisco Certified Network Associate (CCNA)

Cisco Certified Network Associate - Security (CCNA-Security)

Cisco Certified Network Professional (CCNP) - Routing, Switching & MPLS

Cisco Certified Network Professional - Security (ASA Module)

Skills

Networking: Subnetting, Supernetting, VLANs, NAT, Access Lists (ACLs), DHCP Snooping, Private VLAN, VLAN Hopping, VPN, Routing Protocols (RIP, EIGRP, OSPF, BGP), Switching, MPLS (Multi-Protocol Label Switching), Ethernet

Network Security: Firewalls (Cisco ASA, Zone-Based, Reputation-Based, Identity), Firewall Filtering, Control Plane Security, Data Plane Security, Management Plane Security, Network Telemetry (NTP, NetFlow, Logging), Security Context, ASA Failover, IPsec, AAA

Tools & Technologies: Cisco IOS, Cisco ASA
