Education

Mumbai University

B.E Computer Engineering

2015, Mumbai, Maharashtra

Experience

Database Administrator

Full-time - On-site

Marketplace Technologies Ltd

Feb 2017 - Present

- **Project Management:** Managed database systems for enterprise projects including EBoss, Datafeed, MFDB, RTRMS, and IndiaINX, ensuring high availability and performance for mission-critical operations.
- **PostgreSQL Administration:**
 - * Worked on Redhat Linux OS Cluster with Postgresql for High Availability (HA) using Pacemaker.
 - * Coordinated with Developers/Linux teams for database knowledge and support, participating in new release implementations.
 - * Installed and configured Postgresql from source or packages on Redhat Linux servers.
 - * Performed comprehensive Postgresql Server Management tasks including Backup & Restore, Configuration, Roles, Blockings, Tablespace creation, and Troubleshooting.
 - * Collaborated with Storage team for Disaster Recovery (DR) setup built on SAN using EMC technology.
 - * Configured LDAP authentication & GSSAPI Authentication from Windows to Linux for Postgresql.
 - * Configured logical replication for database servers, hot standby Postgresql servers, and faster database backup methods including schema and tablespace backups.
 - * Optimized database performance by configuring maximum connections to the database on Linux servers.
 - * Installed tds_fdw from source for linked servers to connect to heterogeneous databases and other required extensions, backup configuration, and Point-In-Time Recovery (PITR) using base backups.
- **MSSQL Server Administration:**
 - * Provided day-to-day administration of live SQL Servers, ensuring operational continuity and performance.
 - * Participated in Live Primary Recovery (PR) & Disaster Recovery (DR) activities and mocks for new releases into production.
 - * Configured Linked Servers, Transactional replication, and maintenance tasks such as database backup & restore, recovery, scheduled jobs, and maintenance plans.
 - * Installed & configured SQL server 2014/2017 standalone and SQL Cluster servers.
 - * Maintained database security by providing appropriate SQL roles, logins, and permissions to users on demand.
 - * Collaborated with application teams on rollouts, resolving application issues, and managing SQL server migrations.
 - * Demonstrated expertise in handling production systems and understanding client requirements, including environments like Bombay Stock Exchange (BSE) on Windows server 2008 R2, 2012 R2, 2016 Enterprise & Standard.
 - * Performed SQL Server service pack upgrades and hot fixes.
 - * Managed multiple SQL Instances on Windows SQL Cluster environments built on EMC SAN.
 - * Worked on MSSQL DB clusters with active/active & active/passive servers, Always-On Availability Groups (AAG), and High Availability/Disaster Recovery (HA/DR) Setup.
 - * Gained extensive experience on SAN and RAID levels, and building and supporting SQL Cluster servers on SAN Environments.

Skills

Database Languages: SQL

Database Tools: SQL Server 2014/2017 - Postgresql 9.5/9.6 - Oracle 11gR2

Operating Systems: Redhat Linux - Oracle Linux - Windows Server 2012/2016

Oracle 11gR2 Expertise: DB Software Installation - DB Creation (GUI/Silent DBCA) - Architecture -

File/Space/User Mgmt - Control files/Redolog/Archive/Undo Mgmt - Listener/Tnsnames config -

AWR/ADDM/ASH Reports - RMAN Backup/Cloning/Duplicate - Flashback Technologies - Expdp/Impdp -

RAC (Installation, Configuration, Troubleshooting: CRSCTL, SRVCTL) - Data Guard - Database

Upgrades/Patching

PostgreSQL Specifics: HA Clustering (Pacemaker) - Logical Replication - Hot Standby - PITR -

LDAP/GSSAPI Auth - tds_fdw

MSSQL Specifics: Transactional Replication - Linked Servers - Always-On Availability Groups (AAG) -

HA/DR Setup - SQL Cluster - SAN/RAID

Soft Skills: Communication - Self-confidence - Adaptability - Leadership - Teamwork - Problem Solving -

Patient Listener - Quick Learner
