Education

SGBAU Amravati University

Bachelor of Engineering (B.E.) in Computer Science and Engineering

CGPA: 7.21

2014, Amravati, India

Experience

Database Administrator

Full-time

BNY Mellon

Jan 2017 - Present, Pune, India

- Managed and supported critical production, pre-production, test, and reporting databases across various platforms, including capacity management and upgrades. Clients: Over 130+ investment banking organizations.
- Handled day-to-day database activities, monitoring, and incident management.
- Built new databases as per requirements, preparing them for go-live in collaboration with multiple teams.
- Executed scheduled database patching (CPU, PSU) and installed latest patches on production, development, and test databases based on Oracle support recommendations.
- Performed database upgrades from Oracle 11g to 12c.
- Expanded storage by adding disks to ASM disk groups.
- Built and maintained DR databases using Active Data Guard, ensuring synchronization with production and resolving persistent issues.
- Managed Data Guard, including checking lagging status, resolving archive lagging, monitoring RFS/MRP processes, and archive management.
- Addressed and resolved tablespace-related issues.
- Managed user access and profiles.
- Performed data imports and exports using Data Pump.
- Maintained a centralized inventory of all databases.
- Refreshed test environments from production databases.
- Collaborated with Oracle Support to resolve database errors.
- Scheduled daily and weekly database backups using RMAN, and troubleshooted RMAN issues. Performed database cloning using RMAN.
- Participated in cutover activities for application upgrades to higher versions.
- Adhered strictly to ITIL processes for incident and change management.
- Provided weekly reports of issues in team meetings and contributed to service improvement plans.
- Executed database migrations from one server to another or across different platforms.
- Conducted RCA and impact analysis reporting during production outages.

Database Administrator

Full-time

Brose India

Aug 2014 - Dec 2016, Pune, India

- **Project I: Central IT Management**
- Managed internal databases and servers for Brose global operations.
- Provided 24x7 on-call support in rotational shifts.
- Performed day-to-day database activities, monitoring, and responding to DBA group emails for alerts, issues, and ad-hoc business user requests.
- Handled database creation and patching.
- Managed frequent database backups using Data Pump/RMAN and performed database refreshes and recovery.
- Monitored logs and traces for issue resolution.
- Created new VM servers and prepared them for go-live, also managed decommissioning as per requirements.
- Conducted weekly patching of Windows servers using SCCM and took necessary actions.
- Monitored and troubleshooted daily and weekly OS backups using Symantec NetBackup.

- Managed user accounts for OS and database users.
- Monitored OS level alerts using SCOM.
- **Project II: Data Center Migration (Onsite Project)**
- Successfully migrated all servers and databases from one data center location to another.
- Installed Oracle 11g on Linux platforms.
- Processed service requests (Incidents / Change / Request).
- Created users and managed user privileges.
- Configured RMAN backup for databases and performed database patching.
- Configured physical standby databases using Data Guard.
- Cloned servers and migrated them to different clusters.

Skills

Databases: Oracle RDBMS (10g, 11g, 12c), Data Pump, RMAN, Data Guard, ASM, RAC, Golden Gate

Tools: OCC, PUTTY, SQLPLUS, SQL Developer, NetBackup, SCOM, SCCM, VMWare Vsphere

Operating Systems: RHEL 6.0, RHEL 6.5, UNIX, Microsoft Windows

Methodologies: ITIL
