Summary

Highly experienced and results-oriented Database Administrator with over 10 years of expertise in MS SQL Server environments. Proven ability in managing, maintaining, and troubleshooting complex database systems, including high availability, disaster recovery, and performance tuning. Skilled in security implementation, replication, log shipping, and ensuring data consistency across various production environments.

Education

Kakatiya University

B.Sc. in Mathematics

2005, Warangal, India

Experience

Database Administrator Support

Full-time

Barclays Technology Centre India

February 2013 – Present

- Attended various calls from global clients regarding database issues.
- Resolved Web GUI alerts and incident tickets within specified timelines.
- Troubleshooted and fixed log shipping issues and related alerts.
- Identified and resolved blocking and locking related issues in databases.
- Configured and monitored Replication, Log shipping, and Database Mirroring setups.
- Addressed replication and AlwaysOn availability group issues.
- Managed account provisioning tasks by granting and revoking permissions.
- Provided on-call support during weekends, performed DR tests, and handled weekly maintenance and change requests.

Database Support

Full-time

Accord Fintech (Contracted for CITI Bank)

September 2008 – February 2013

- Developed and implemented backup and recovery strategies for production environments.
- Ensured data consistency through extensive use of DBCC and DMV commands.
- Gained hands-on experience in query tuning, stored procedures, and resolving performance issues.
- Managed DR processes, including log shipping and database mirroring configurations.
- Scheduled and monitored various database jobs effectively.
- Implemented and maintained MS SQL Server security and database permissions.
- Performed daily maintenance, reviewing SQL error logs and Event Viewer for proactive issue resolution.

SQL Server Database Administrator

Full-time

Wipro Infotech Pvt Ltd

May 2006 – August 2008

- Performed comprehensive SQL Server databases implementation and maintenance tasks.
- Executed installation, configuration, upgradation, and migration of SQL Server instances.
- Monitored and troubleshoot database issues to ensure optimal performance.
- Created and maintained indexes, and performed rebuilds and reorganizations.
- Managed linked servers between SQL instances and configured database mail.
- Developed DTS packages for automating routine and complex tasks.

Certificates

SQL Server Database Administrator

Skills

RDBMS: MS SQL Server (2000, 2005, 2008, 2012, 2014), SQL lite speed

Operating Systems: Windows XP/7, Windows Server (2008, 2012)

Tools & Utilities: SSMS, Performance Monitor, SQL Profiler, Query Analyzer, DTS

Database Management: Database Administration, Maintenance, High Availability (AlwaysOn, Clustering, Log Shipping, Mirroring, Replication), Performance Tuning, Backup & Recovery, Disaster Recovery (DR),

Security Management, Query Tuning, Index Management, Job Scheduling, Upgrades & Migrations

Fundamentals: MS Office (2003, 2007)
