Education

Mumbai University

Bachelor of Science, Information Technology

May 2011 – May 2014, Mumbai, India

Experience

Database Administrator

Full-time - On-site

Accelya Kale Solutions Ltd.

November 2019 – November 2023, Cairo, Egypt

- Administered Oracle 11g and 12c databases in a 24x7 support environment, ensuring high availability and performance.
- Performed database upgrades from Oracle 11g to 12c and installed critical patches to maintain system security and stability.
- Managed comprehensive backup and recovery procedures, including cold, hot, and RMAN backups, along with import/export dumps.
- Automated daily operational activities using cronjobs, shell scripts, and database schedulers to enhance efficiency.
- Developed Plan of Actions (POAs) for various database activities and raised Service Requests (SRs) with Oracle Support for issue resolution.
- Handled user requests and maintained effective client interaction, providing timely support and solutions.
- Monitored and managed database growth, tablespaces, datafiles (adding, resizing, renaming), and ASM diskgroups.
- Configured and managed Physical Standby databases to ensure business continuity and disaster recovery capabilities.
- Performed database migrations using export/import and RMAN backups, and from Non-ASM to ASM file systems.
- Managed network settings via listener.ora and tnsnames.ora, and created database links, tablespaces, and directories.
- Utilized SCP ticketing tool for tracking client requests and ensured proper documentation and follow-up.
- Executed maintenance activities such as Index Rebuilding, stats gathering, and online/offline database re-organization.
- Troubleshoot basic performance issues and set up new database environments within specified timelines.
- Created and managed user accounts and privileges with appropriate roles and security levels.
- Conducted Grid infrastructure upgrades from 11g to 12C.

Oracle Database Administrator

Full-time - On-site

Insolutions Global Ltd.

March 2017 – October 2019, Giza, Egypt

- Performed Oracle software installation (graphical/silent), database upgrades, and patch upgrades.
- Maintained a large-scale database environment, including 80+ UAT DB servers, 40 production DBs, and 28 standby/DR DBs.
- Managed and created Disaster Recovery (DR) and standby servers, ensuring database synchronization.
- Executed backup and recovery operations using RMAN and Datapump, and performed switchover and failover activities.
- Allocated system storage and planned future storage requirements for the database systems.
- Enrolled users and maintained system security across various database instances.
- Monitored critical database components including Alert logs, Snap ID generation, DB size, server space, and OEM reports.
- Controlled and monitored user access to the database, ensuring compliance with security policies.
- Scheduled shell scripts and dbms_jobs using Crontab or DBMS_SCHEDULER for monitoring, listener checks, and AWR reports.
- Managed production databases for both Oracle and SQL Server, including resizing datafiles, tablespaces, and transactional logs.
- Administered Temp and Undo tablespaces, and created primary database storage structures based on application requirements.

Certificates

Oracle DBA - Date Not Specified

Skills

Databases: Oracle (11g, 12c), SQL Server, RMAN, Datapump, ASM, OEM, Tablespaces, Datafiles, Listeners, TNSNAMES

Operating Systems: RH Linux, Windows

Scripting & Automation: Shell Scripting, Cronjobs, DBMS_SCHEDULER

Tools & Concepts: SCP Ticketing Tool, Backup & Recovery, Disaster Recovery (DR), Standby Databases, Database Migration, Performance Tuning, Security Management, User Management, Storage Management, Patching, Upgrades

Soft Skills: Teamwork, Problem-solving, Client Interaction, Learning Agility
