Education

Mumbai University

B.E Computer Engineering

May 2016, Mumbai, India

Dr. DY Patil Jr College

Higher Secondary Certificate

Mumbai, India

Experience

Database Administrator (DBA)

Full-time - On-Site

Marketplace Technologies Ltd (client: BSE Bombay Stock Exchange)

Feb 2017 - Present, Mumbai, India

- Managed database administration for critical financial systems for clients like BSE Bombay Stock Exchange, handling key projects including EBoss, Datafeed, MFDB, RTRMS, and IndiaINX.
- Provided comprehensive administration for various database environments including Red Hat Linux OS cluster with PostgreSQL (9.5, 9.6) and Windows SQL Cluster (2014, 2017).
- **PostgreSQL Expertise:**
 - * Designed and implemented High Availability (HA) solutions using Pacemaker on Red Hat Linux OS clusters.
 - * Collaborated with development and Linux teams, providing database knowledge and support.
 - * Managed full lifecycle of PostgreSQL servers: installation from source/packages, configuration, backup & restore, user roles, blocking resolution, tablespace management, and troubleshooting.
 - * Coordinated with storage teams for Disaster Recovery (DR) setups on SAN using EMC technology.
 - * Configured advanced authentication methods (LDAP, GSSAPI) and logical replication for hot standby PostgreSQL servers.
 - * Optimized database performance by configuring maximum connections and implementing PITR (Point-In-Time Recovery) with base backups.
 - * Integrated heterogeneous databases by installing and configuring tds_fdw for linked server functionality.
- **MS SQL Server Expertise:**
 - * Administered live SQL Server environments, ensuring operational stability and performance.
 - * Actively participated in Primary Recovery (PR) and Disaster Recovery (DR) activities and mock drills for new production releases.
 - * Managed SQL Server features including Linked Servers, Transactional Replication, and comprehensive maintenance tasks (backup & restore, recovery, scheduled jobs, maintenance plans).
 - * Deployed and configured standalone and clustered SQL Server 2014/2017 instances.
 - * Enforced database security through precise management of SQL roles, logins, and user permissions.
 - * Supported application teams with rollouts, issue resolution, and SQL server migrations.
 - * Successfully performed SQL Server service pack upgrades and hot fixes.
 - * Managed and supported multiple SQL instances within Windows SQL Cluster environments, including Always-On Availability Groups (AAG) for HA/DR, built on EMC SAN with knowledge of RAID levels.

Skills

Database Systems: Oracle 11gR2 (RAC, Data Guard), PostgreSQL (9.5, 9.6), MS SQL Server (2014, 2017)

Database Management: SQL, RMAN, DBCA, Expdp/Impdp, AWR/ADDM/ASH Reports, Backup & Restore (Hot/Cold, PITR), Cloning/Duplication, Flashback Technologies, Replication (Logical, Transactional, Always-On AG), Security (Roles, Logins, Permissions), Tablespace Management, User Management

Operating Systems: Red Hat Linux, Oracle Linux, Windows Server (2012, 2016)

Tools & Technologies: Pacemaker, LDAP, GSSAPI, EMC SAN, CRSCTL, SRVCTL, O patch, tds_fdw

Methodologies: Disaster Recovery (DR), High Availability (HA)
