Summary

Highly accomplished and Microsoft Certified Professional with 11 years of progressive experience in database administration, specializing in MS SQL Server environments (2016/2014/2012/2008 R2/2008). Proven expertise in ensuring high availability, performance tuning, and robust security for critical database systems. Skilled in incident, change, and problem management, with experience in leading and mentoring DBA teams. Seeking to leverage advanced technical skills and leadership capabilities to drive data excellence.

Education

Indira College, Pune University

Masters of Science, Computer Science

Pune, Maharashtra, India

Experience

SQL Server Database Administrator

Full-time

Ensono

Sep 2022 – Present, Cairo, Egypt / Remote

- Assumed SQL Server database administration responsibilities following an employment transfer as part of a project acquisition from Wipro.

Lead Database Administrator

Full-time

Wipro Technologies

Mar 2018 – Aug 2022, Cairo, Egypt / Remote

- Led and managed a team of 5 SQL DBAs from offshore in a multi-client environment, overseeing Data Center services.
- Managed incident, change, and problem management processes for the SQL Server Database team, ensuring high availability and performance.
- Provided expert administration for MS SQL Server 2016/2014/2012/2008 R2/2008, including installation, upgrade, configuration, and maintenance.
- Implemented and managed Always On Availability Groups, database mirroring, replication, clustering, and log shipping for robust disaster recovery and high availability.
- Actively participated in quarterly Disaster Recovery (DR) activities and Service Improvement Plan (SIP) creation.
- Handled high-severity issues, providing prompt resolution and comprehensive Root Cause Analysis (RCA).
- Conducted performance tuning and optimization of SQL Server databases to ensure efficient operation.
- Participated in PCI scan report activities, implementing security hotfixes and service packs to mitigate vulnerabilities.
- Gained understanding and certification in Microsoft Azure, including Azure VM, Storage, Network, AD, and Azure SQL database.
- Mentored team members and guided trainees, providing Knowledge Transfer (KT) and ongoing support.
- Provided on-call support during out-of-office hours and weekends for critical database issues.

Senior Database Administrator

Full-time

Mphasis

Jan 2016 – Feb 2018, Cairo, Egypt / Remote

- Administered and configured MS SQL Server 2012/2008 R2/2008, ensuring optimal performance and reliability.
- Managed Always On Availability Groups, log shipping, database mirroring, and clustering solutions.
- Executed SQL Server patching activities and installed security hotfixes to address vulnerabilities.
- Monitored daily reports for cluster failover, backups, AG/LS/Mirror status, and server disk space.
- Addressed service requests, incidents, and critical issues, providing timely resolution and RCA.
- Participated in quarterly Disaster Recovery (DR) activities, supporting failover/failback procedures.
- Collaborated with Windows teams to provide DBA support during patching and database health checks for high-availability setups.
- Performed all essential health checks for market-open servers and provided updates during market open calls.

- Conducted performance tuning to enhance database efficiency and responsiveness.

Database Administrator

Full-time

Synechron Technologies Pvt. Ltd

Jun 2013 – Dec 2015, Pune, India

- Provided comprehensive support for SQL Server, Oracle (10g/RAC, 11g), and Netezza databases.
- Responsible for MS SQL Server 2008 R2/2008 installation, upgrade, and administration.
- Conducted capacity planning for database growth across all SQL Servers.
- Troubleshooted and resolved alerts to ensure continuous database operation.
- Implemented and managed log shipping and database mirroring configurations.
- Pursued in-depth training on Oracle 11g Architecture and SQL Server.
- Carried out version changes for schemas (e.g., PE8 to EE11) as per defined processes within the Oracle 11g environment.

Database Administrator

Full-time

Mastek Ltd

Jan 2012 – May 2013, Pune, India

- Administered SQL Server 2008 R2/2008, including installation, upgrade, backup, and restore operations.
- Performed MS SQL Server audits to ensure compliance and security.
- Worked with database mirroring, replication, log shipping, and clustering for high availability.
- Supported User Acceptance Testing (UAT) and Production (PROD) environments.
- Reviewed deployment documents and executed application deployments.

Projects

Dairy Industry ERP System

Jan 2011 – Dec 2011

PP Software Systems Ltd. Designed and developed Master Data Management and Procurement modules for a dairy industry ERP system.

- Customized ERP system functionalities to meet specific client requirements.
- Leveraged Core Java and PostgreSQL for system development and database management.

Certificates

Microsoft Certified Professional

Microsoft Azure Certified

Skills

Operating Systems: MS Windows Server (2012, 2008 R2, 2008, XP)

Databases: MS SQL Server (2016, 2014, 2012, 2008 R2, 2008), Oracle (11g, 10g), Netezza, PostgreSQL

Cloud Platforms: Microsoft Azure (VM, Storage, Network, AD, SQL Database)

DB Administration: Always On Availability Groups, Database Mirroring, Log Shipping, Replication, Clustering, Performance Tuning, Installation, Upgrade, Migration, Patching, Backup/Restore, Capacity Planning, Security Hotfixes, DR Activity, Auditing

Tools: MS LiteSpeed, Idera SQL Safe, SSMS, Upgrade Advisor, SQL Server Profiler, SCOM, Diagnostic Manager, Remedy, Jira, Infopacc, Tivoli TDP Backup Tool, SQL Pack, Holmes BOTS Automation

Methodologies: Incident Management, Change Management, Problem Management, Root Cause Analysis (RCA), Service Improvement Plans (SIP)

Programming: Core Java
