Education

Pune University

Master of Computer Science (MCS)

Graduated: January 2018

Pune, Maharashtra, India

Experience

Database Administrator

Full-time

Infinetworx Omnichannel Pvt. Ltd

Sept 2017 - Present

- Administered Oracle, MySQL, MariaDB, and SQL Server databases, including installation, configuration, and updates, ensuring high availability and performance for production, development, and test environments.
- Managed Oracle 10g/11g databases, performing critical tasks such as tablespace monitoring and growth planning, data file relocation, and schema design and implementation.
- Designed and implemented robust backup and recovery strategies (RMAN, Export/Import/Datapump) to ensure data integrity and minimize downtime, including incremental, cumulative, and full backups.
- Provided 24/7 support, troubleshooting and resolving database performance issues, job failures, session problems, and connectivity issues (e.g., Listener status) with prompt root cause analysis.
- Implemented and maintained database replication setups, facilitating data consistency across environments.
- Managed database security, including user creation, privilege assignment, role management, and enforcement of security policies, granting appropriate quotas and access.
- Proactively monitored database health by regularly checking trace files, alert logs, and ORA errors, and executing DDL & DML scripts as required.
- Contributed to team development through mentoring, coaching, and active involvement in the recruitment process.
- Ensured project success by spearheading activities, documenting projects, generating daily reports, and complying with quality norms and change management processes.

Database Consultant (Clients: Banking Domain)

Project-based

InnovativeTechnologies

Various Engagements

- Provided specialized database consulting services to clients within the demanding banking sector, ensuring robust and compliant data management solutions.

Skills

Database Technologies: Oracle 10g/11g, MySQL, MariaDB, PostgreSQL, MongoDB, SQL, RMAN, Data Pump

Database Administration: Replication Setup, Schema Design, Performance Tuning, Backup & Recovery, User & Privilege Management, Tablespace Management, Listener Management, 24/7 Support

Operating Systems & Tools: Windows, Linux, Putty
