

Aya Abdel Rahman

Oracle Database Administrator

aya.abdelrahman@email.com | +20 100 123 4567 |  github.com/aya-abdel-rahman |  linkedin.com/in/aya-abdel-rahman

Summary

Highly experienced Oracle Database Administrator with 4 years of expertise in Linux/Microsoft environments. Proficient in Oracle 11g R2, 12c, and 18c, database administration, performance tuning, backup/recovery (RMAN), and supporting 24x7 production environments. Adept at AWS cloud services and managing complex hydrocarbon accounting solutions.

Education

Amravati University

M.B.A.

January 2011, Amravati, Maharashtra, India

Nagpur University

B.C.A.

January 2007, Nagpur, Maharashtra, India

Experience

Oracle Database Administrator

Full-time, On-Site

TIETO INDIA PVT. LTD

February 2015 - Present, Pune, India

- Administered Oracle Databases (11g R2, 12c, and 18c) for an end-to-end hydrocarbon accounting solution (Energy Components) used by oil & gas super majors.
- Provided 24x7 support for test and production database environments, coordinating closely with Application, OS, Storage, and Development Teams.
- Monitored database performance and health by regularly checking trace files, Alert logs, CPU usage, I/O, and memory utilization; raised SRs with Oracle for critical issues.
- Managed database backups using RMAN, including configuration and restoration procedures.
- Performed installation, configuration, and updates of Oracle server software (11g, 12c), client installations, and PL/SQL developer tools.
- Created databases using DBCA and manual methods, establishing users with appropriate privileges and roles.
- Generated AWR, ASH, and ADDM reports to analyze and resolve database performance issues.
- Managed database space, including renaming/resizing data files and performing tablespace shrinking.
- Proficiently performed data Exports and Imports using Oracle Datapump.
- Configured and managed Oracle Listener and Network Files, including Tnsnames via NETMGR/NETCA.
- Maintained critical database components such as tablespaces, data files, control files, and online redo log files.
- Utilized AWS cloud services (EC2, S3, RDS, ELB, EBS, VPC, Route53, Auto, CloudWatch, CloudFront, IAM) for installing, configuring, troubleshooting, and migrating servers to the cloud.

Skills

Operating Systems: LINUX - Windows Server 2012 R2 - Windows 98/2000/XP

Databases: Oracle 10g - Oracle 11g - Oracle 12c - Oracle DBA - RAC - Golden Gate - ASM - Data Guard

Tools & Utilities: SQL*Loader - SQL*PLUS - OEM - Datapump - expdp/impdp - PLSQL Developer - Jenkins

Scripting: UNIX Shell Scripting - SQL

Cloud Platforms: AWS (EC2, S3, RDS, ELB, EBS, VPC, Route53, Auto, CloudWatch, CloudFront, IAM)
