

Rania Ismail

Lead Database Administrator

rania.ismail@email.com | +20 101 234 5678 |  github.com/rania-ismail |  linkedin.com/in/rania-ismail

Education

Walchand College

Bachelor of Engineering, Information Technology

January 2007, Sangli, Maharashtra, India

Govt. Polytechnic

Diploma, Computer Engineering

January 2004, Jalgaon, Maharashtra, India

Experience

Lead Database Administrator

Full-time

Tieto Software

June 2015 - Present, Cairo, Egypt

- Maximized application availability from 99.3% to 99.8%.
- Presented Proof of Concepts for over 10 cases, contributing to business growth.
- Delivered timely upgrades of various applications to maintain platform support.
- Effectively managed P1, P2 issues to meet Service Level Agreements (SLAs).
- Produced comprehensive Capacity reports for Data, Middleware, and Web layers of various applications.
- Generated Work Orders based on customer requirements.
- Designed robust databases for diverse applications.
- Planned and executed RMAN backup/recovery and Business Continuity Planning (BCP) strategies.
- Conducted Business Continuity Testing for critical applications.
- Introduced Zero Cost high availability solutions, including Active-Passive Failover.
- Optimized performance through scripting automation initiatives.
- Established standardized cloning procedures for all application layers.
- Implemented infrastructure changes such as Firewall Openings and LoadBalancer configurations for new applications.
- Eliminated downtime by troubleshooting complex issues for Middleware products like OIM, OAM, and SOA.
- Contributed to building and maintaining the Integration Layer, including SMTP, FTP, Reverse Proxy, and OCM.
- Provided database support across PROD, UAT, TEST, and DEV environments.
- Performed Database Refresh/Cloning from production to development and support databases.
- Reduced risk level through consistent database upgrades and patching.
- Protected databases by assigning appropriate roles and privileges as per Segregation of Duties (SOD).
- Generated and maintained Middleware schemas using RCU.
- Exceeded scope of work by supporting and maintaining WebLogic platform (installation, patching, troubleshooting issues).
- Expanded duties to web servers: installation and maintenance of OHS, Apache, and Tomcat.

Database Administrator

Full-time

HSBC Software

July 2011 - May 2015, Giza, Egypt

- Handled incidents and service requests as part of day-to-day database administration tasks for a project supporting HSBC Bank France.
- Delivered basic implementation services including database installation, patching, and upgrades.
- Performed capacity planning, managing tablespaces and compressions.
- Contributed to maintaining database quality by managing instances, indexes, re-organization, and performance monitoring/tuning using AWR and ADDM reports.
- Maintained comprehensive backups and recovery of databases: logical (exp/imp), datapump (expdp/impdp), cold, hot, RMAN (backup/restore, duplication).
- Reduced efforts through automation: developed shell scripts for automated housekeeping operations and scheduled backups using crontab/at.
- Implemented high availability solutions, including Dataguard.

Skills

Databases: Oracle Databases 12c, 11g, 10g, RMAN, ASM, DataGuard

Middleware: Weblogic 12c, 11g, OIM, OAM, SOA

Scripting & Automation: Shell Scripts

Web Servers: OHS, Apache, Tomcat

DevOps Architecture: Architecture Designs, Proof of Concepts, DevOps

Database Administration: Backup & Recovery, Performance Tuning, Capacity Planning, High Availability, Database Design, Cloning
