Education

Mumbai University

Bachelor of Science, Information Technology

May 2011 - May 2014, Mumbai, Maharashtra

Experience

Database Administrator

Full-time

Accelya Kale Solutions Ltd

May 2016 - May 2018

- Administered databases in a 24/7 support environment, maintaining Oracle 11g and 12c databases.
- Performed database upgrades from Oracle 11g to 12c and installed critical database patches.
- Executed cold and hot backups on schedule and diligently monitored backup processes.
- Managed data imports via export dumps to other databases as required by client demands.
- Automated daily activities through cronjobs, shell scripts, and schedulers to enhance efficiency.
- Developed Plan of Actions (POAs) for various database maintenance and upgrade activities.
- Raised Service Requests (SRs) with Oracle Support for issues of varying severity levels.
- Handled user requests and ensured proper client interaction and communication.
- Monitored and managed database growth, tablespaces, adding, resizing, and renaming datafiles.
- Restored databases using RMAN backups for consistency checks and data recovery.
- Migrated databases utilizing export/import tools and RMAN backups.
- Configured and managed Physical Standby databases for disaster recovery.
- Created database links, tablespaces, and database directories.
- Managed network settings by configuring listener.ora and tnsnames.ora files.
- Restored data using old logical backups as per client requests.
- Performed schema replication across databases using the Data Pump tool.
- Used SCP ticketing tool for tracking and managing client requests.
- Conducted maintenance activities such as Index Rebuilding and statistics gathering.
- Troubleshoot basic performance issues to ensure optimal database operation.
- Set up new database environments within specified timelines.
- Added/deleted disks in ASM and monitored ASM diskgroups.
- Created users and assigned privileges with appropriate roles and security levels.
- Performed online and offline database re-organization for performance enhancement.
- Migrated databases from Non-ASM to ASM file systems.
- Upgraded Grid Infrastructure from 11g to 12c.

Oracle Database Administrator

Full-time

Insolutions Global Ltd

May 2014 - May 2016

- Performed Oracle software installation (graphical/silent), database upgrades, and patch upgrades.
- Maintained approximately 80+ UAT DB servers, 40 production DBs, and 28 standby/DR DBs.
- Managed and created DR & standby servers, ensuring database synchronization.
- Executed backup and recovery operations using RMAN and Data Pump.
- Performed activities such as switchover and failover for high availability.
- Allocated system storage and planned future storage requirements for database systems.
- Enrolled users and maintained system security according to policies.
- Monitored Alert logs, Snap ID generation, database size, server space, and OEM reports.
- Controlled and monitored user access to the database.
- Scheduled shell scripts and dbms_jobs using Crontab or DBMS_SCHEDULER for monitoring, listener checks, and backups.
- Planned comprehensive backup and recovery strategies for databases.
- Managed production databases for Oracle and SQL Server, including resizing of database files, datafiles, tablespaces, and transactional logs.
- Managed Temp and Undo tablespaces for optimal database performance.
- Created primary database storage structures (tablespaces) based on application developer designs.

Certificates

Oracle DBA

Skills

Database Technologies: Oracle 11g - Oracle 12c - Oracle ASM - SQL Server

Database Administration: Installation - Backup & Recovery (RMAN, Data Pump) - Space Management - User & Security Management - Monitoring - Performance Tuning - Replication - Migration - Patching - Upgrades - Standby/DR - Switchover/Failover

Operating Systems: Red Hat Linux - Windows

Scripting & Automation: Shell Scripting - Cronjobs - DBMS_SCHEDULER

Tools: Oracle Enterprise Manager (OEM) - SCP Ticketing Tool

Soft Skills: Teamwork - Problem Solving - Learning Agility - Client Interaction
