Education

Pune University

MCS (Master of Computer Science)

January 2018

Pune, India

Experience

Database Administrator

On-Site

Infinetworx Omnichannel Pvt. Ltd

Sept 2017 - Present

- Managed Oracle (10g, 11g), MySQL, MariaDB, PostgreSQL, and MongoDB database systems, ensuring optimal performance and availability for production, development, and test environments.
- Implemented comprehensive backup and recovery strategies, including Oracle RMAN (incremental, cumulative, full) and logical backups (Export/Import/Datapump), ensuring data integrity and disaster recovery readiness.
- Provided 24/7 expert support to diagnose and resolve critical database performance issues, job failures, and session-related problems, minimizing downtime and business impact.
- Executed full lifecycle database administration tasks: creating/monitoring tablespaces, managing data files, control files, online redo logs, and performing schema changes.
- Administered user accounts, roles, privileges, and managed tablespace quotas across various database systems to enforce robust security policies.
- Conducted regular monitoring of trace/alert logs for ORA errors, listener status, and background processes, proactively identifying and rectifying issues.
- Collaborated with development teams to execute DDL & DML scripts and provided critical DBA support for query resolution and replication setups.
- Mentored and coached junior team members, actively participating in recruitment processes, project documentation, and daily reporting.
- Ensured strict compliance with quality norms and change management processes, contributing to successful project completion and non-conformance resolution.

Database Consultant

On-Site

InnovativeTech Solutions

June 2016 - August 2017

- Provided specialized database consulting services to major clients within the banking domain.
- Assisted in optimizing database architectures and ensuring robust data management practices for financial applications.

Skills

Databases: Oracle 10g, Oracle 11g, MySQL, MariaDB, PostgreSQL, MongoDB

Operating Systems: Windows, Linux

Tools: SQL, Putty, RMAN, Datapump

Concepts: Database Administration, Replication, Backup & Recovery, Performance Tuning, Security Policies, Schema Design, DDL/DML, Change Management
