Education

SGBAU Amravati University

Bachelor of Engineering (B.E.) in Computer Science and Engineering

CGPA: 7.21/10

2014, Amravati, India

Experience

Database Administrator

Full-time - On-site

BNY Mellon

Jan 2017 - Present, Cairo, Egypt

- Supported and managed critical production, pre-production, test, and reporting databases across various platforms.
- Executed capacity management and performed database upgrades from 11g to 12c, applying CPU and PSU patches as per Oracle support recommendations.
- Handled day-to-day database activities including monitoring, incident management, and building new databases from requirements to go-live.
- Managed Oracle ASM disk groups, configured Active Data Guard for Disaster Recovery (DR) databases, and ensured data synchronization.
- Performed Data Guard management, including checking lagging status, resolving archive lagging, and managing RFS/MRP processes.
- Addressed tablespace-related issues, managed user access and profiles, and performed data import/export using Data Pump.
- Maintained a centralized inventory of all databases and performed test environment refreshes from production databases.
- Collaborated with Oracle Support for error resolution and scheduled/troubleshoot daily/weekly RMAN backups, including database cloning.
- Participated in application cutovers, strictly followed ITIL processes for incident and change management, and provided weekly reports.
- Executed database migrations across servers and platforms, and conducted RCA and impact analysis for production outages.

Database Administrator

Full-time - On-site

Brose India

Jan 2015 - Dec 2016, Alexandria, Egypt

- **Central IT Management**
- Managed internal databases and servers globally, providing 24x7 on-call support in rotational shifts.
- Monitored and responded to DBA group emails for alerts, issues, and ad-hoc business user requests.
- Performed database creation, patching, backup (Data Pump/RMAN), and refreshes/recovery using RMAN and Data Pump.
- Monitored logs and traces for issue resolution and managed VM server creation and decommissioning.
- Conducted weekly patching of Windows servers using SCCM and monitored/troubleshoot daily/weekly OS backups via Symantec NetBackup.
- Managed user accounts for OS and database users, and monitored OS-level alerts using SCOM.
- **Data Center Migration (Onsite Project)**
- Successfully executed the migration of all servers and databases during a data center relocation.
- Installed Oracle 11g on Linux platforms and handled service requests (Incidents, Changes, Requests).
- Created and managed user privileges, configured RMAN backups, and performed database patching.
- Configured physical standby databases using Data Guard and performed server cloning for cluster migrations.

Skills

Databases: Oracle RDBMS (10g, 11g, 12c), Data Pump, RMAN, Data Guard, ASM, RAC, Golden Gate

Tools & Technologies: OCC, PUTTY, SQLPLUS, SQL Developer, Netbackup, SCOM, SCCM, VMWare Vsphere

Operating Systems: RHEL 6.0, RHEL 6.5, UNIX, Microsoft Windows

Concepts & Practices: Database Management, Capacity Management, Incident Management, Change Management (ITIL), Database Upgrades, Cloning, Migrations
