Education

Bachelor of Engineering in Information Technology

Walchand College

January 2007, Sangli, Maharashtra

Diploma in Computer Engineering

Govt. Polytechnic

January 2004, Jalgaon, Maharashtra

Experience

Lead Database Administrator

Tieto Software

2013 - 2022, Cairo, Egypt

- Maximized availability of applications from 99.3% to 99.8%.
- Raised business by presenting Proof of Concepts for over 10 cases.
- Delivered upgrades of various applications to keep them on a supported platform.
- Saved SLAs as per contract by effectively handling P1 and P2 issues.
- Produced Capacity reports comprising all layers (Data, Middleware, Web) of various applications.
- Generated Work Orders as per customer need.
- Designed databases for various applications.
- Planned RMAN backup and recovery, and Business Continuity Planning (BCP) strategies.
- Executed Business Continuity Testing for various applications.
- Introduced Zero Cost high availability solutions including Active-Passive Failover.
- Optimized performance through scripting automation.
- Established cloning procedures for all layers of various applications.
- Delivered Infrastructure changes, such as FW Openings and LoadBalancer configuration for new applications.
- Eliminated downtime by troubleshooting issues for Middleware products like OIM, OAM, and SOA.
- Contributed to building and maintaining the Integration Layer (SMTP, FTP, Reverse Proxy, OCM).
- Provided database support to PROD, UAT, TEST, and DEV environments.
- Performed Database Refresh/Cloning from production to development and support databases.
- Reduced risk level by upgrading and patching databases regularly.
- Protected databases by assigning appropriate roles and privileges as per Segregation of Duties (SOD).
- Generated and maintained Middleware schemas using RCU.
- Exceeded scope of work by supporting and maintaining WebLogic platform (installation, patching, troubleshooting issues).
- Expanded duty scope to web servers: Installed and maintained OHS, Apache, and Tomcat.

Database Administrator

HSBC Software

2007 - 2013, Giza, Egypt

- Handled incidents and service requests as day-to-day database administration tasks.
- Delivered basic implementation services including Database installation, patching, and upgrades.
- Performed capacity planning by managing tablespaces and compressions.
- Contributed to maintaining database quality by managing instances, indexes, re-organization, and performance monitoring & tuning using AWR, ADDM reports.
- Maintained backups and recovery of databases using logical backups (exp/imp), datapump (expdp/impdp), cold backups, hot backups, RMAN backup/restore, and RMAN Duplication.
- Reduced efforts through automation, including writing shell scripts for automated housekeeping operations, scheduling backups, and using crontab/at to schedule tasks.
- Implemented high availability solutions like Dataguard.

Skills

Databases & Data Management: Oracle Databases (12c, 11g, 10g), RMAN, ASM, DataGuard, SQL, Database Architecture, Performance Tuning, Backup & Recovery, Cloning, Refresh

Middleware Web Servers: Weblogic (12c, 11g), OIM, OAM, SOA, OHS, Apache, Tomcat, SMTP, FTP, Reverse Proxy, OCM

Scripting Automation: Shell Scripts, Automation, DevOps, Infrastructure Management (FW Openings, LoadBalancer Configuration)

Methodologies Concepts: Architecture Designs, Proof of Concepts, Capacity Planning, Business Continuity Planning (BCP), High Availability, SLA Management, Incident & Service Request Management, Segregation of Duties (SOD)
