Education

Sadvidya Pre-University College

Pre-University Diploma

CGPA: N/A

June 2012, Mysore, India

Experience

Application Database Administrator - DBMS (Oracle)

On-Site

IBM Egypt

Jan 2018 - Jul 2020, Cairo, Egypt

- Managed Oracle SQL databases for client, Blue Cross Blue Shield MA, handling capacity planning, installation, configuration, design, migration, security, troubleshooting, backup, and data recovery.
- Administered client databases on Oracle v10, v11, v12 platforms running on Linux, ensuring optimal performance and reliability.
- Effectively communicated with clients across diverse locations to facilitate data elicitation and understand business requirements.
- Diligently processed numerous business requests and resolved production issues promptly and effectively within defined Service Level Agreements (SLAs).
- Led a team in coordination with business stakeholders to conduct weekly checkouts of database servers and systems, ensuring continuous operation.

Projects

Retail and Banking Predictive Model

Jan 2019 - Jul 2020

- Designed a predictive business model for retail and banking sectors utilizing machine learning techniques in R programming.
- Developed the model to inform and enhance business and marketing strategies, contributing to data-driven decision-making.

Certificates

IBM Certification: Statistics 101 - 2020

IBM Certification: Applied Data Science with R - 2020

IBM Certification: Big Data Foundations - 2020

IBM Certification: Data Science Foundations - 2020

Business Analytics Certification (Edvancer Eduventures, Pune) - 2020

Skills

Database: SQL - Oracle (v10, v11, v12) - Database Design - Data Recovery - Capacity Planning
Programming & ML: R Programming - Python - Machine Learning - Statistical Modelling - Linear Regression
Tools & OS: Linux
Soft Skills: Client Management - Teamwork - Communication - Leadership - Problem Solving - Multitasking - Quick Learning
