Education

Cairo University

Bachelor of Science in Computer Engineering

CGPA: 3.86

May 2018, Giza, Egypt

Experience

Senior Hadoop Developer

Egy-Tech Solutions

Full-time

Jan 2021 - Dec 2023

- Led the development of a global repository in Hadoop for banking analytics, consolidating data from various data warehouse systems.
- Analyzed banking rates datasets, created detailed specification documents, and provided accurate effort estimations.
- Developed SPARK Scala and SPARK SQL programs using Eclipse IDE in Windows/Linux environments.
- Designed KPI's test scenarios, test cases, and documented test results; executed Scala programs in Linux Spark Standalone mode.
- Setup multi-cluster on AWS and deployed Spark Scala programs, ensuring robust and scalable operations.
- Provided comprehensive solutions utilizing the Hadoop ecosystem including HDFS, MapReduce, Pig, Hive, HBase, and Zookeeper.
- Implemented solutions for large-scale server-side systems with distributed processing algorithms.
- Created reports for the BI team by exporting data into HDFS and Hive using Sqoop.
- Supported and assisted in troubleshooting and optimization of MapReduce jobs and Pig Latin scripts.
- Applied deep understanding of Hadoop design principles, cluster connectivity, security, and performance factors.
- Managed data import and export between Oracle, Teradata, and RDBMS into HDFS/Hive/HBase using Sqoop, TPT, and Connect Direct.
- Developed scripts for temporary HDFS storage and subsequent loading into Hive tables.
- Created Sqoop scripts to enable interaction between Pig and MySQL Database.
- Involved in developing Hive Reports and partitioning Hive tables for improved performance.
- Maintained technical documentation for launching HADOOP clusters and executing HIVE queries and PIG scripts.
- Executed Hadoop jobs for processing millions of records of text data.

Hadoop Developer

Mobilyte Telecom

Full-time

Mar 2019 - Dec 2020

- Installed and configured Apache Hadoop tools including Hive, Pig, HBase, and Sqoop for application development and unit testing.
- Wrote MapReduce jobs to discover trends in data usage by customers, contributing to churn identification.
- Managed database connections efficiently using SQOOP for data integration.
- Created Hive tables, loaded data, and developed complex queries using HiveQL.
- Optimized Hive queries through partitioning and joining Hive tables for enhanced performance.
- Experienced in SQL DB Migration to HDFS, ensuring seamless data transfer.
- Utilized NoSQL (HBase) for faster performance, maintaining de-normalized data for OLTP operations.
- Collected data from distributed sources into Avro models, applied transformations, standardizations, and loaded into HBase for further processing.
- Defined and orchestrated job flows using Oozie to manage complex data pipelines.
- Implemented Fair schedulers on the Job tracker to effectively share cluster resources for MapReduce jobs.
- Exported analyzed data to relational databases via HIVE for visualization and generating reports for the BI team.

Skills

Big Data Technologies: Hadoop, HDFS, MapReduce, Pig, Hive, HBase, Spark, Sqoop, Flume, Oozie, Storm, Cloudera, Zookeeper

Programming Languages: Scala, Java, Python, Shell Scripting, SQL (HiveQL, PL/SQL)

Databases: Oracle, Teradata, MySQL, NoSQL, HBASE

Tools & Platforms: Linux, AWS, Eclipse IDE, Tomcat, Putty, SVN, GitHub, IBM WebSphere v8.5, Connect Direct, TPT
