

# Fatma Nasser

Hadoop Developer

fatma.nasser@email.com | +20 100 123 4567 |  github.com/fatma-nasser |  linkedin.com/in/fatma-nasser

## Education

---

### Pune University

M.C.A

Pune, India

## Experience

---

### Hadoop Developer

Full-time - On-site

PRGX India Private Limited

Jan 2018 - Dec 2022

- Leveraged extensive experience in Big Data ecosystems including Hadoop, HDFS, HBase, Map Reduce, Sqoop, Hive, Pig, Spark-Core, and Flume.
- Developed and implemented complex business logic for data analysis and processing, contributing to multiple critical projects.
- Managed end-to-end data pipelines, from data ingestion using Sqoop and Flume to processing with Spark and MapReduce, and data storage in Hive.
- Collaborated with cross-functional teams (10-15+ members) to deliver robust data solutions for diverse client needs.

## Projects

---

### Bank Customer Expenditure Analysis System

PRGX India Private Limited | Hadoop, Spark, Sqoop, Scala, Flume.

Pune, India

- Developed an analytical system for a bank to analyze customer expenditure behavior for personalized product offers and financial planning tools.
- Imported data from legacy systems to Hadoop using Sqoop and Flume.
- Implemented complex business logic to analyze expenditure data and pre-process it using Spark.
- Created Hive scripts for data loading and sourcing various attributes to retrieve accurate analytical results.

### Web Application Data Storage & Extraction System

PRGX India Private Limited | Hadoop, HDFS, Hive, Sqoop, MySQL, Map Reduce.

Pune, India

- Designed and implemented a solution to store terabytes of web application information in HDFS and extract meaningful insights.
- Moved raw crawl data flat files from micro websites to HDFS for processing.
- Utilized Sqoop for efficient interaction with MySQL database.
- Developed MapReduce scripts to process raw HTML data, obtaining product and user information, and extracting visitor tracking reports.
- Created Hive tables to store processed data in tabular formats for further analysis and reporting.

### Pfizer Inc. Development Data Repository (DDR)

PRGX India Private Limited | Informatica 9.5, Oracle 11g, UNIX.

Pune, India

- Built a Development Data Repository for Pfizer Inc. to reduce direct SQL requests on OLTP systems and enhance performance.
- Analyzed requirements and designed Informatica mappings using basic (Filter, Router, Source Qualifier, Lookup) and advanced (Aggregators, Joiner, Sorters) transformations.
- Performed cross-unit and integration testing, reported and fixed bugs to ensure data integrity and accuracy.
- Created workflows and batches, setting session dependencies for automated data loading processes.
- Implemented Change Data Capture (CDC) using mapping parameters, Slowly Changing Dimensions (SCD) type 1 and 2, and surrogate key generation.
- Developed Mapplets and reusable transformations to populate data into the data warehouse, and managed sessions/worklets for target database loading.
- Involved in Unit Case Testing (UTC) and User Acceptance Testing (UAT) for SCD, fact load, and CDC implementations.

## **Skills**

---

**Big Data Ecosystems:** Hadoop - HDFS - HBase - Map Reduce - Sqoop - Hive - Pig - Spark-Core - Flume  
**Programming Languages:** Scala - Core-Java - SQL - PLSQL - Shell Scripting  
**ETL Tools:** Informatica Power Center 8.x/9.6 - Talend 5.6  
**Development Tools:** Eclipse - IntelliJ Idea  
**Platforms:** Windows Family - Linux /UNIX - Cloudera  
**Databases:** MySQL - Oracle 10/11g
