Experience

Hadoop Developer

On-Site

Braindatawire

2016 - 2017

- Involved in deploying the product for customers, gathering requirements, and algorithm optimization at the backend of the product.
- Loaded and transformed large datasets of structured and semi-structured data.
- Responsible for managing data coming from different sources and applications.
- Supported Map Reduce programs running on the cluster.
- Involved in creating Hive tables, loading with data, and writing Hive queries which ran internally in a Map Reduce way.
- Contributed to Rplus, a cloud-based solution (Demand Sense) for accurate demand prediction, combining enterprise and external data through social conversation and sentiments, identifying significant sales drivers, and selecting optimal forecasting models.

Skills

Programming: Core Java - Map Reduce - Scala

Hadoop Tools: HDFS - Spark - Map Reduce - Sqoop - Hive - Hbase - Hadoop - Hadoop Distributed File System

Database: MySQL - Oracle

Scripting: Shell Scripting

IDE: Eclipse

Operating Systems: Linux (CentOS) - Windows

Source Control: Git (Github)
