

Amr Abdel Rahman

Systems Engineer / Hadoop Developer

amr.abdelrahman@email.com | +20 101 234 5678 |  github.com/amr-abdel-rahman |  linkedin.com/in/amr-abdel-rahman | amrabdelrahman.com

Education

Gujarat Technological University

Bachelors of Engineering

January 2016, Ahmedabad, India

Experience

Systems Engineer / Hadoop Developer

Full-time - Cairo, Egypt

Tata Consultancy Services

Jan 2018 - Dec 2019

- Contributed to big data analytics for a premier American pharmaceutical company, managing large volumes of United Healthcare data from diverse sources (patient records, medicines, treatment pathways).
- Operated within a fully distributed Hadoop cluster (CDH3) with 10 data nodes + 3 masters, 20 TB capacity, and NFS backup for NameNode.
- Developed proof of concepts for enterprise-wide Hadoop adoption.
- Utilized SparkAPI over Cloudera Hadoop YARN for analytics on healthcare data within the Cloudera distribution.
- Managed cluster maintenance, including node operations, monitoring, troubleshooting, data backups, and log file review.
- Performed large-scale data import and export between various sources and HDFS using Sqoop.
- Developed Pig scripts and Hive reports, including implementing Hive partitioning and bucketing for external and internal tables.
- Monitored Hadoop scripts responsible for loading data from HDFS into Hive.
- Developed and optimized Spark scripts using Scala shell commands, working with DataFrames/SQL/Datasets and RDDs/MapReduce to improve existing Hadoop algorithms.
- Collaborated with cross-functional teams (infrastructure, network, database, application, BI) to ensure data quality and availability.
- Generated reports using Tableau and facilitated data export to HDFS and Hive via Sqoop.
- Implemented ORC & Parquet file formats for data serialization and Snappy for data compression.

Certificates

TCS Certified Hadoop Developer - 2019

Awards & Honors

Appreciation for articulate leadership qualities - Tata Consultancy Services, 2019

Skills

Big Data Technologies: Hadoop - Spark - Sqoop - Hive - Flume - Pig

Operating Systems: Linux (Ubuntu) - Windows OS

Data Visualization & Tools: Tableau - SVN - Beyond Compare

Programming: Scala
