Education

Medi-caps Institute of Technology & Management

B.E. Electronics & Communication

Indore, Madhya Pradesh, India

Graduated: 2015 (Assumed)

Experience

Hadoop Developer / Data Engineer

Full-time

Tata Consultancy Services

June 2015 – January 2018

- Developed and automated proactive Health Check utilities for Data Lake, ensuring smooth functioning of Hadoop components and delivering results via HTML email.
- Engineered and optimized data pipelines to ingest data from RDBMS databases to Hive external tables using Sqoop, incorporating data quality checks.
- Created Flume agents for real-time data processing into the Hadoop ecosystem.
- Optimized Hive and Impala queries to enhance performance and minimize Hadoop resource utilization.
- Contributed to setting up Hadoop clusters, including edge node configuration and High Availability (HA) implementation for Hive Server2, Impala, and HDFS.
- Developed and automated various cluster health, usage, and capacity reports using Unix shell scripting.
- Performed benchmark testing on Hive, Impala, and Dataiku against Greenplum database for performance evaluation.
- Rescheduled jobs from Autosys to TWS for improved performance and stability within the WM Hadoop ecosystem.
- Participated in an Initial Learning Program (June 2015 - August 2015) focused on organizational standards and technical grooming.

Projects

Data Lake Program (Tata Consultancy Services)

June 2015 - January 2018

- Provided necessary engineering support for a multi-talent, secure data hub on a Hadoop platform with strong data governance, lineage, auditing, and monitoring capabilities.
- Developed and automated various requirement-specific utilities to ensure the stability and smooth functioning of the Hadoop ecosystem.

ABSA- Reconciliations, UBC and WMDATALAKE COE (Tata Consultancy Services) Dates within Employment

- Managed the migration of data from RDBMS databases to the Hadoop ecosystem (Hive) to enhance data processing speed and facilitate easier analysis and decision-making.
- Optimized SQL and Hive queries, and developed Sqoop scripts to efficiently transfer and analyze large datasets, overcoming RDBMS limitations.

Intellimatch Migration (Tata Consultancy Services)

Dates within Employment

- Extracted and analyzed business requirements to implement new reconciliations (Recs).
- Migrated static reconciliation setups from Intellimatch version 8.1 to 9.1, including extensive back-end work involving SQL queries for data provisioning.

PSO (Tata Consultancy Services)

Dates within Employment

- Participated in project PSO activities.

Skills

Programming Languages: Python – Shell Scripting – SQL – Scala

Big Data Technologies: Apache Hadoop – Hive – Pig – Sqoop – Flume – Oozie – Impala – HDFS – Spark – MapReduce

Tools & Platforms: Dataiku – Unravel – Cloudera – Putty – HUE – Cloudera Manager – Eclipse – Resource Manager – Unix
