Education

Pune University

M.C.A

Pune, India

Experience

Hadoop Developer

Full-time

PRGX India Private Limited

Date - Date, Pune, India

- **Project: Bank Customer Behavior Analysis Platform**
- Analyzed customer expenditure behavior to develop an analytical report and product offer system for a banking client using Hadoop framework.
- Utilized Hive, Spark, Sqoop, Scala, and Flume to import data from legacy systems, implement business logic, pre-process data, and create Hive scripts for data loading.
- Sourced various attributes for data processing logic to ensure accurate results and regulatory compliance.
- **Project: Web Application Data Processing & Reporting System**
- Developed a Hadoop-based solution to store and process terabytes of web application data, extracting meaningful information and generating reports.
- Managed data ingestion from micro websites to HDFS using Sqoop for database interaction.
- Engineered MapReduce scripts to process raw HTML data, extract product/user information, and generate visitor tracking reports for further processing.
- **Project: Development Data Repository for Pharmaceutical Corporation**
- Built a Development Data Repository (DDR) for Pfizer Inc. to optimize OLTP system performance by replacing direct SQL requests.
- Extracted clinical, pre-clinical, study, product, subject, and site information from upstream applications (EPECS, CDSS, RCM, PRC, E-CLINICAL, EDH).
- Designed and implemented complex Informatica mappings with various transformations (Filter, Router, Source qualifier, Lookup, Aggregators, Joiner, Sorters) to load data into DDR core tables.
- Created snapshot and dimensional layers for reporting applications, including Maplets and reusable transformations for data population.
- Performed Unit Case Testing (UTC), cross-unit and integration testing, bug fixing, and implemented Change Data Capture (CDC) using mapping parameters and SCD Type 1/Type 2.
- Managed workflow/batches and session dependencies in Informatica Power Center 9.5, working with Oracle 11g and UNIX environments.

Skills

Big Data Ecosystems: Hadoop, HDFS, HBase, MapReduce, Sqoop, Hive, Pig, Spark-Core, Flume

Programming Languages: Scala, Core-Java, SQL, PL/SQL, Shell Scripting

ETL Tools: Informatica Power Center 8.x/9.6, Talend 5.6

Development Tools: Eclipse, IntelliJ IDEA

Platforms: Windows Family, Linux/UNIX, Cloudera

Databases: MySQL, Oracle 10g/11g
