Education

Cairo University

CGPA: 3.2/4.0

Bachelor of Science in Computer Engineering

May 2016, Giza, Egypt

Relevant Courses: Data Structures - Algorithms - Distributed Systems - Database Systems

Experience

Hadoop Developer

Full-time - On-Site

Braindatawire

2016 - 2017, Cairo, Egypt

- Developed and optimized cloud-based solutions (Demand Sense) for accurate demand prediction, leveraging enterprise data, social conversation, and sentiment analysis.
- Involved in deploying products for customers, gathering requirements, and optimizing algorithms at the backend.
- Loaded and transformed large datasets, including structured and semi-structured data.
- Managed data ingestion from diverse sources and applications.
- Supported and maintained MapReduce programs running on the cluster.
- Created Hive tables, loaded data, and developed Hive queries for MapReduce execution.

Skills

Programming Languages: Core Java - Scala - MapReduce

Big Data Technologies: Apache Hadoop HDFS - Apache Spark - MapReduce - Apache Sqoop - Apache Hive - Apache Hbase

Databases: MySQL - Oracle

Scripting: Shell Scripting

Development Tools: Eclipse - Git - GitHub

Operating Systems: Linux (CentOS) - Windows
