Education

Gujarat Technological University

Graduated: Jan 2016, Gujarat, India

Bachelors of Engineering in Engineering

Experience

Systems Engineer/Hadoop Developer

On-Site

Tata Consultancy Services

Jan 2016 - Jan 2018, Mumbai, India

- Lead development efforts for a Big Data Analytics solution for a premier American biopharmaceutical company, processing extensive United Healthcare data.
- Managed the entire data lifecycle, including gathering, storing, and processing patient records, medication data, treatment pathways, and patient journey analytics.
- Administered and monitored a fully distributed CDH3 Hadoop cluster (20 TB capacity, 10 Data Nodes, 3 Masters), ensuring high availability and optimal performance.
- Developed and optimized Spark scripts using Scala, leveraging DataFrames/SQL/Datasets and RDDs for efficient healthcare data analytics.
- Engineered Pig scripts and Hive reports, implementing partition and bucketing strategies for internal and external tables.
- Utilized Sqoop for seamless import and export of large datasets between HDFS and various data sources, including for Tableau reporting.
- Collaborated cross-functionally with infrastructure, network, database, application, and BI teams to guarantee data quality and availability.
- Employed ORC & Parquet file formats for data serialization and Snappy for compression, enhancing data storage and processing efficiency.

Projects

Enterprise Healthcare Data Platform

2016 - 2018

- Designed and implemented a robust big data analytics platform for a leading biopharmaceutical firm, handling diverse United Healthcare data.
- Processed records of patients, medicines, and treatment pathways to support health outcomes and patient finder initiatives.
- Built proof of concepts for enterprise-wide Hadoop adoption and data analytics utilizing a CDH3 cluster (20 TB, 10 Data Nodes).
- Developed advanced SparkAPI solutions over Cloudera Hadoop YARN for in-depth analysis of complex healthcare datasets.

Certificates

TCS Certified Hadoop Developer - 2018

Awards & Honors

Appreciation for Articulate Leadership Qualities - Tata Consultancy Services, 2018

Skills

Big Data: Hadoop - Spark - Sqoop - Hive - Flume - Pig

Programming: Scala

Operating Systems: Linux (Ubuntu) - Windows

Tools: Tableau - SVN - Beyond Compare
