Education

Gujarat Technological University

Bachelors of Engineering

January 2016, Gujarat, India

Experience

Systems Engineer/Hadoop Developer

On-Site

Tata Consultancy Services

January 2016 - December 2017, Mumbai, India

- Worked on a fully distributed CDH3 cluster with 20TB capacity, including 10 Data Nodes, 3 Masters, and NFS Backup for NN.
- Developed proof of concepts for enterprise adoption of Hadoop.
- Utilized SparkAPI over Cloudera Hadoop YARN to perform analytics on healthcare data within Cloudera distribution.
- Responsible for cluster maintenance, adding/removing nodes, monitoring, troubleshooting, managing data backups, and reviewing Hadoop log files.
- Imported & exported large datasets to and from HDFS using Sqoop.
- Developed Pig scripts and Hive Reports.
- Implemented Hive partition and bucketing concepts; created external and internal Hive tables. Monitored Hadoop scripts loading data from HDFS into Hive.
- Developed Spark scripts using Scala shell commands, working with Data frames/SQL/Data sets and RDD/MapReduce in Spark. Optimized existing Hadoop algorithms using SparkContext, Spark-SQL, Data Frames, and RDD's.
- Collaborated with infrastructure, network, database, application, and BI teams to ensure data quality and availability.
- Developed reports using Tableau and exported data to HDFS and Hive using Sqoop.
- Used ORC & Parquet file formats for serialization of data, and Snappy for data compression.

Certificates

TCS Certified Hadoop Developer

Awards & Honors

Appreciation for showing articulate leadership qualities in doing work with the team.

Skills

Big Data Technologies: Hadoop - Spark - Sqoop - Hive - Flume - Pig

Operating Systems: Linux - Ubuntu - Windows 2007/08

Tools: Tableau - SVN - Beyond Compare

Programming: Scala
