Experience

Hadoop Developer

Full-time - On-site

PRGX India Private Limited

Jan 2018 – Dec 2022

- Developed and maintained large-scale data processing solutions using Big Data technologies and ETL tools across multiple client projects.
- Specialized in implementing business logic, data pre-processing, and reporting mechanisms for diverse data analytics requirements.
- Collaborated within teams of 10-15+ members to deliver robust and high-performance data solutions.

Projects

Bank Customer Expenditure Analysis System (PRGX India)

Jan 2021 – Dec 2022

- Developed a Hadoop-based analytics system for a bank to analyze customer expenditure behavior across online shopping, medical, cash transactions, and debit card usage.
- Generated analytical reports to inform product offers displayed on a Java customer portal, assisting customers with budget planning and financial forecasts.
- Imported data from legacy systems using Sqoop and Flume, implemented complex business logic for data analysis, and pre-processed data with Spark.
- Created Hive scripts for data loading and sourced various attributes to ensure accurate processing and regulatory compliance.

Web Application Data Storage and Extraction (PRGX India)

Jan 2019 – Dec 2020

- Designed and implemented a Hadoop-based solution to store terabytes of information from web applications and extract meaningful insights.
- Processed raw HTML data from micro websites to obtain product and user information using Map/Reduce jobs.
- Generated various reports based on visitor tracking information and exported processed data for further analysis.
- Moved crawl data flat files to HDFS, utilized Sqoop for seamless database interaction, and created Hive tables for structured data storage.

Pfizer Development Data Repository (DDR) (PRGX India)

Jan 2018 – Dec 2018

- Built a Development Data Repository for Pfizer Inc. to enhance OLTP system performance by offloading direct SQL requests.
- Extracted clinical, pre-clinical, study, product, subject, and site-related information from upstream applications (EPECS, CDSS, RCM, PRC, E-CLINICAL, EDH).
- Applied complex business logic to populate DDR core tables, subsequently creating snapshot and dimensional layers for reporting applications.
- Designed Informatica mappings using various transformations, performed cross-unit and integration testing, and implemented Change Data Capture (CDC).
- Developed Mapplets, reusable transformations, and managed workflows/batches for data loading into the target database, ensuring Unit Case Testing (UTC) and UAT compliance.

Skills

Big Data Ecosystems: Hadoop - HDFS - HBase - Map Reduce - Sqoop - Hive - Pig - Spark-Core - Flume

Programming Languages: Scala - Core-Java - SQL - PLSQL - Shell Scripting

ETL Tools: Informatica Power Center 8.x/9.6 - Talend 5.6

Tools & Platforms: Eclipse - IntelliJ Idea - Windows Family - Linux /UNIX - Cloudera

Databases: MySQL - Oracle 10/11g
