

Dina Farouk

Hadoop Developer

dina.farouk@email.com | +20 101 234 5678 |  github.com/dina-farouk |  linkedin.com/in/dina-farouk | dinafarouk.com

Education

Pune University

M.C.A

CGPA: Not Specified

Year of Graduation: Unknown, Pune, India

Experience

Hadoop Developer

PRGX India Private Limited

Full-time - On-Site

Dates Not Specified, Pune, India

- **Project 1: Bank Product Analytics**
- Analyzed customer expenditure behavior (online shopping, medical, cash, debit card) to help the bank offer relevant products, utilizing Hadoop for data analysis compliant with regulations. **Environment:** Hive, Spark, Sqoop, Scala, Flume.
- Imported data from legacy systems to Hadoop using Sqoop and Flume; implemented business logic for data analysis; pre-processed data with Spark; created Hive scripts and loaded data into Hive; sourced various attributes for accurate results.
- **Project 2: Web Application Data Storage & Extraction**
- Designed a solution to store terabytes of web application information in Hadoop File System (HDFS) and extract meaningful insights using Map/Reduce jobs. **Environment:** Hadoop, HDFS, Hive, Sqoop, MySQL, Map Reduce.
- Moved crawl data flat files from various micro sites to HDFS for processing; implemented Sqoop for interaction with MySQL database; wrote Map Reduce scripts to process raw data files; created Hive tables to store processed data in tabular formats; generated reports from Hive data.
- **Project 3: Development Data Repository for Pfizer Inc.**
- Constructed a Development Data Repository (DDR) to replace direct SQL requests on the OLTP system, improving performance for Pfizer Inc.'s downstream applications like Etrack, TSP, RTS, SADMS, GFS, GDO. **Environment:** Informatica 9.5, Oracle11g, UNIX.
- Understood and analyzed requirement documents; designed Informatica mappings using various basic (Filter, Router, Source Qualifier, Lookup) and advanced (Aggregators, Joiner, Sorters) transformations; performed cross-unit and integration testing, reporting and fixing bugs.
- Created workflows/batches and set session dependencies; implemented Change Data Capture (CDC) using mapping parameters, Slowly Changing Dimensions (SCD), and Surrogate Key (SK) generation.
- Developed Maplets and reusable transformations to populate data into the data warehouse; created Sessions & Worklets using workflow Manager to load data into the Target Database; involved in Unit Case Testing (UTC) and User Acceptance Testing (UAT) for SCD Type1/Type2, fact load, and CDC implementation.

Skills

Big Data Ecosystems: Hadoop - HDFS - HBase - Map Reduce - Sqoop - Hive - Pig - Spark-Core - Flume

Programming Languages: Scala - Core-Java - SQL - PLSQL - Shell Scripting

ETL Tools: Informatica Power Center 8.x/9.6 - Talend 5.6

Development Tools: Eclipse - IntelliJ Idea

Platforms: Windows Family - Linux /UNIX - Cloudera

Databases: MySQL - Oracle 10/11g
