Summary

Experienced professional with expertise in Informatica Power Center (ver. 9.1 and 10) ETL Tool, including mapping design and usage of multiple transformations. Proficient in integrating various data sources like SQL Server tables and Flat Files into target data warehouses. Possesses strong working knowledge of SQL/PLSQL on Microsoft SQL server 2010, Unix shell scripting, and error debugging. Skilled in job scheduling using Autosys, and incident/change management with Service Now, JIRA, and Agile Central. Basic knowledge of Intellimatch reconciliation tool.

Education

Walchand College of Engineering

Bachelor of Technology in Computer Science Engineering

January 2010 – January 2014, Sangli, Maharashtra

Willingdon College

Higher Secondary Certificate (H.S.C)

October 2009, Sangli, Maharashtra

Martin's English School

Secondary School Certificate (S.S.C)

August 2007, Sangli, Maharashtra

Experience

ETL Developer / IT Analyst

Full-time

Tata Consultancy Services

January 2014 – January 2018, London, UK

- Analyzed, designed, and developed ETL strategies and processes, including writing comprehensive ETL specifications for client projects.
- Conducted thorough requirement gathering sessions to understand client needs and translate them into functional and low-level design documents.
- Developed and debugged Informatica mappings, resolving bugs and identifying root causes of failures to ensure data integrity and system stability.
- Interacted directly with users to identify and resolve issues related to data loaded through the application, improving user satisfaction and data accuracy.
- Designed and implemented complex mappings utilizing various transformations within Informatica Power Center to consolidate data into standardized feeds.
- Contributed to the implementation of a strategic technical solution for governance and monitoring of break standards, enhancing audit capabilities.
- Managed data remediation efforts, focusing on consolidating data from front and back office systems into an ETL layer for pre-processing and reconciliation.

Skills

ETL Tools: Informatica Power Center (ver. 9.1 and 10), ETL, Extract Transform Load

Databases: MS SQL Server 2010, SQL, PL/SQL

Operating Systems: UNIX (Shell Scripting, Error Debugging)

Tools & Platforms: Autosys, Service Now, JIRA (36 months), Agile Central, Intellimatch (Reconciliation)
