

Sara Ibrahim

IT Analyst, ETL Specialist

sara.ibrahim@email.com | +20 101 234 5678 |  github.com/sara-ibrahim |  linkedin.com/in/sara-ibrahim | saraibrahim.com

Summary

Highly motivated IT Analyst and ETL Specialist with extensive experience in Informatica Power Center (ver. 9.1 and 10) ETL processes, including mapping design and transformation usage. Proficient in integrating diverse data sources like SQL Server tables and Flat Files into data warehouses. Possesses strong working knowledge of SQL/PLSQL on Microsoft SQL Server 2010, Unix shell scripting for error debugging, and job scheduling with Autosys. Experienced in incident management and change requests using Service Now, JIRA, and Agile Central, with basic knowledge of Intellimatch for reconciliation.

Education

Walchand College of Engineering

B.Tech Computer Science Engineering

January 2010 - January 2014

Sangli, Maharashtra, India

Experience

IT Analyst

On-Site

Tata Consultancy Services (Client: Barclays UK)

Feb 2014 - Feb 2018

- Analyzed, designed, and developed ETL strategies and processes, including writing comprehensive ETL specifications.
- Led requirement gathering sessions to define project scope and detailed data integration needs.
- Authored functional documents and low-level design documents for ETL solutions.
- Developed and debugged Informatica mappings to resolve bugs and identify causes of failures in data workflows.
- Interacted with users to pinpoint data loading issues through the application and implemented corrective actions.
- Developed complex mappings utilizing various Informatica transformations to achieve data consolidation and standardization.

Projects

HEXAD Project (Barclays UK)

Feb 2014 - Feb 2018

Tata Consultancy Services implemented a strategic technical solution to support governance and monitoring of break standards, including enhancements to audit capabilities.

- Performed remediation of source system data feeds, consolidating data into standardized feeds for consumption by the ETL layer.
- Designed and developed the ETL layer to consume remediated data feeds effectively.
- Pre-processed and delivered data from Front and Back office systems, alongside static data, to the reconciliation tool for accurate reconciliation processes.

Skills

ETL & Data Integration: Informatica Power Center (9.1, 10), ETL, Extract, Transform, Load, Intellimatch (Reconciliation)

Databases Scripting: MS SQL Server 2010, SQL/PLSQL, Unix Shell Scripting

Tools Methodologies: Autosys (Job Scheduling), Service Now (Incident Management), JIRA, Agile Central
