Education

Cairo University

BCA Cairo, Egypt

Experience

ETL Developer

Full-time - On-site

Sun Trust Bank, New York, USA

JAN 2018 - Present

- Liaised closely with Project Manager, Business Analysts, Product Architects, and Requirements Modelers (CFOC) to define technical requirements and create project documentation.
- Performed development using Informatica 9.1, Oracle 11g, and UNIX environments.
- Utilized Informatica PowerCenter for extraction, transformation, and loading (ETL) of data into the database.
- Created and configured Sessions in Informatica workflow Manager for loading data into database tables from various heterogeneous database sources like Flat Files, Oracle etc.
- Conducted unit testing and system integration testing of the developed mappings.
- Provided production support for the deployed code.
- Offered solutions to the business for production issues.
- Maintained one-to-one interaction with the client throughout the project and in daily meetings.

Projects

Marshall Multimedia Project

JUN 2016 - DEC 2017

Client: Marshall Multimedia

New York, USA

- Developed mappings using different sources by utilizing Informatica transformations.
- Created and configured Sessions in Informatica workflow Manager for loading data into Data Mart tables from various heterogeneous database sources like Flat Files, Oracle etc.
- Conducted unit testing and system integration testing of the developed mappings.
- Provided solutions to the business for production issues.

ACT BI - State Datamart

NOV 2015 - MAY 2016

Client: Assurant healthcare/Insurance

Miami, USA

- Performed small enhancements to the data mart.
- Responsible for daily load monitoring of ETL processes.
- Addressed Informatica job failures by analyzing root causes and resolving them using standard documented processes.
- Experienced in writing complex SQL statements for data manipulation and analysis.
- Demonstrated strong problem analysis & resolution skills, adept at working in multi-platform environments.
- Scheduled Informatica jobs using the Informatica scheduler for automated execution.
- Extensively applied ETL methodology for developing and supporting data extraction, transformations, and loading processes within a corporate-wide ETL solution using Informatica.
- Involved in creating Unit cases and uploading them to Quality Center for Unit Testing and UTR.
- Ensured that daily support tasks were performed in accordance with the defined SLA.

Skills

Database: Oracle 11g

Domains: Investment Banking - Advertising - Insurance

Programming: SQL - PL/SQL

BI Tools: Informatica 9.1 - Informatica PowerCenter

Operating Systems: Windows - Unix

ETL Technologies: ETL - Extract, Transform, and Load - Informatica - Oracle - UNIX
