Summary

Knowledge of Informatica Power Center (ver. 9.1 and 10) ETL Tool: Mapping designing, usage of multiple transformations. Integration of various data source like SQL Server tables, Flat Files, etc. into target data warehouse. SQL/PLSQL working knowledge on Microsoft SQL server 2010. Unix Work Description: shell scripting, error debugging. Job scheduling using Autosys, Incident management and Change Requests through Service Now, JIRA, Agile Central. Basic knowledge of Intellimatch (Reconciliation tool).

Education

Walchand College of Engineering

B.Tech in Computer Science Engineering

January 2010 - January 2014, Sangli, India

Willingdon College

H.S.C. (Higher Secondary Certificate)

October 2009, Sangli, India

Martin's English School

S.S.C. (Secondary School Certificate)

August 2007, Sangli, India

Experience

ETL Developer / IT Analyst

Full-time

Tata Consultancy Services

January 2014 - January 2018, Cairo, Egypt

- Contributed to the Barclays UK London/HEXAD project, implementing strategic technical solutions for governance and monitoring of break standards, including audit capability enhancements.
- Performed remediation of source system data feeds, consolidating data into standardized feeds for consumption by the ETL layer.
- Designed the reconciliation tool to source data from the ETL layer, pre-processing and delivering data from Front and Back office systems, and static data to the reconciliation tool.
- Responsible for analyzing, designing, and developing ETL strategies and processes, and writing ETL specifications.
- Conducted requirement gathering and prepared functional and low-level design documents.
- Developed and debugged Informatica mappings to resolve bugs and identify causes of failures.
- Interacted with users to identify issues with data loaded through the application.
- Developed mappings using various transformations within Informatica Power Center.

Skills

ETL Tools: Informatica Power Center (v9.1, 10), Intellimatch

Databases: MS SQL Server 2010, SQL, PL/SQL

Operating Systems: Unix (Shell Scripting)

Job Scheduling & Management: Autosys, Service Now, JIRA, Agile Central

Concepts: ETL, Extract, Transform, and Load, Reconciliation
